CONSOLIDATED PROCEEDINGS UNDER THE TRADE MARKS ACT 1994

IN THE MATTER OF APPLICATION NO 3880617

BY SDA GROUP LTD

TO REGISTER THE TRADE MARK

MisterChef

IN CLASSES 7, 8, 11, 16, 21, 25, 30, 31, 35 AND 41

AND THE OPPOSITION THERETO UNDER NO 441984

BY SHINE TV LIMITED

AND IN THE MATTER OF APPLICATION NO 3858347

BY SDA GROUP LTD

TO REGISTER THE TRADE MARK

IN CLASSES 7 AND 11

AND THE OPPOSITION THERETO UNDER NO 440252

BY SHINE TV LIMITED

BACKGROUND AND PLEADINGS

1. SDA Group Ltd (”the applicant”) has applied to register two trade marks that have been opposed by Shine TV Limited (”the opponent”).

The opposition against 3880617

2. UK trade mark number 3880617 for the word ’MisterChef’ was filed on 21 February 2023 (the relevant date) for goods and services in classes 7, 8, 11, 16, 21, 25, 30, 31, 35 and 41. The full specification is set out at annex 1 of this decision (it amounts to 97 pages).

3. The opponent filed an opposition based on sections 5(2)(b), 5(3) and 5(4)(a) of the Trade Marks Act 1994 (the Act). The following table shows the marks, goods and services relied on and the goods and services opposed under sections 5(2)(b) and 5(3) of the Act:

4. Section 5(2)(b) of the Act prevents registration of a mark that is similar to the opponent's earlier marks, for goods and/or services that are the same or similar, such that there will be a likelihood of confusion.

5. The opponent submits that the contested trade mark, MisterChef, is visually, aurally and conceptually highly similar to each of the the earlier marks.

6. With regard to the similarity between the respective goods and services, the opponent submits the following, which I have taken from the statement of grounds:[1]

'654 and '606 marks

[1] The pages attached to the statement of grounds do no have paragraph numbers so I will number the paragraphs continuously.

7. Classes 7, 8 and 11 in the application are similar to class 21 in the specifications of the earlier marks as they are all kitchen equipment. Both sides have class 21 in their specification. The opponent submits that these competing goods are identical or highly similar and the applicant's retail services in class 35 relate to retail of the same or similar goods contained in the specification of the earlier trade marks.

'733 mark

8. The opponent submits that the applicant's goods in class 16 are identical to 'printed publications relating to food and cookery' in the specification of the earlier mark. The contested application's 'entertainment services' in class 41 are identical to the earlier mark's services in relation to the 'production, presentation and distribution of a television programme', and the contested application's services in relation to 'sporting and cultural activities' are similar. The goods in the Contested Application's class 21 are all identical or similar to the earlier mark's 'household and kitchen utensils; pots; kitchen tools; knife boards; lids for pots; slotted spoons; turners'. The goods in the contested application's classes 7, 8 and 11 are all similar to the earlier mark's class 21 goods, as they are all kitchen equipment. The listed class 35 services of the contested application are similar to the earlier mark's registered class 16 and class 21 goods, given that they include retail of identical or similar goods.

'851 mark

9. The goods applied for in classes 30 and 31 are identical or highly similar to the earlier mark's foodstuff goods in classes 29 and 30.

'801 mark

10. The earlier mark has retail services for the goods in classes 7, 8, 11 and 21 of the application, meaning they are similar. Both have retail services in class 35 and these are identical or similar.

'787 mark

11. The earlier mark is registered in class 41 for identical or similar services to those contained in class 41 of the application.

'306 mark

12. Submissions relating to the ‘306 mark’s goods and services and their similarity to the application are said to be contained in the continuation sheet to the TM7. They are not.”

13. The 5(3) ground of opposition requires the opponent to show its earlier marks have a reputation in the UK such that the registration of the contested MisterChef word mark, without due cause, would allow it to take unfair advantage of, or be detrimental to, the distinctive character or the repute of the opponent’s earlier trade marks.

14. The opponent claims that the similarity between its earlier marks and the application is such that the relevant public will believe the marks are used by the same or an economically connected undertaking because:

> *”The Contested Mark is highly similar to the earlier mark visually, aurally and conceptually.*
>
> *The Opponent's reputation is for a highly successful and long-running television show, which is licensed for a wide range of goods and services. The goods applied for under the Contested Mark include cookbooks, kitchenware, kitchen equipment, clothing including aprons, foodstuffs, all goods commonly licensed in relation to a television programme in the field of cooking and food, and the services include retail services of such goods, entertainment services and cooking instruction which are also clearly related to such a television program.*
>
> *The reputation and enhanced distinctiveness of the earlier mark, coupled with the similarity between the relevant goods and services are such that - if the Contested Mark is used for any of the contested goods or services - the relevant public will believe that the Contested Mark is being used by the Opponent, or that there is an economic connection between the parties.”*

15. The opponent claims damage will result under all three heads of damage available to it under the Act. The wording for each mark appears to be the same and in respect

of the claim that the contested application will take unfair advantage of the earlier marks, it reads as follows:

> *"Even if there is no likelihood of confusion (which is not accepted), because of the reputation and enhanced distinctiveness of the earlier mark, and the high degree of similarity between the marks and the similarity between the relevant goods and services, it is highly likely that the average consumer would make a 'link' between the mark applied for and the earlier trade mark. Such a 'link', whether there exists a likelihood of confusion or not, is likely to cause the average consumer to bestow, on the goods/services marketed under the Contested Mark, the same qualities associated with the services provided under the earlier mark for which the Opponent enjoys a reputation. As a result, the Applicant's goods/services would enjoy a marketing boost for which the Applicant has not paid. Such use, without due cause, would therefore ride on the coat-tails of the Opponent and take unfair advantage of the reputation of the Opponent's earlier mark which the Opponent has gained through significant financial investment."*

16. The opponent claims there will be detriment to the reputation of its earlier marks because:

> *"Should there be any poor publicity or consumer feedback arising from the quality of the goods/services provided by the Applicant under the Contested Mark applied for, the fact that a 'link' would be made by the relevant public to the Opponent's earlier mark, whether or not there exists a likelihood of confusion, would be damaging and detrimental to the reputation of the Opponent and its earlier mark."*

17. The opponent claims there will be detriment to the distinctive character of its earlier marks and submits:

> *"Such a link, whether or not there exists a likelihood of confusion, is likely to weaken the ability of the earlier trade mark to identify goods/services from or connected to the Opponent. Such use would, therefore, without due*

cause, dilute the attractive power of the Opponent's earlier trade mark and would be detrimental to the distinctive character of the earlier trade mark and may, in particular, lead to a loss of custom, irrespective of actual confusion."

18. Under section 5(4)(a) of the Act the opponent must show that it had goodwill in a business at the relevant date and that the MASTERCHEF sign relied upon is associated with, or distinctive of, that business. In the context of the goodwill, use of the contested mark mark at the relevant date must result in a misrepresentation that leads to damage. The opponent relies on the sign MASTERCHEF against all of the goods and services in the application (see annex 1). It claims the sign has been used throughout the UK, since 2 July 1990. It claims goodwill in the MASTERCHEF sign for the following:

> Entertainment services, including, a television series in the reality genre in the field of cooking and food; production, presentation and distribution of television programs; audio-visual recordings and downloadable television shows; cookware; kitchen equipment; kitchen appliances; kitchen utensils and apparatus; knives; chopping boards; aprons; books including cook and recipe books; foodstuffs; retail of merchandise products; the licensing of IP rights for merchandise products and experiential services.

19. In its statement of grounds the opponent submits:

> *"Through extensive and long-standing commercial use of the earlier mark, the Opponent has built up valuable and protectable goodwill in its business in the United Kingdom. In 2017, the Opponent's television show celebrated its 200th series production. It is produced in over 60 territories and broadcast in over 200, watched by over 1 billion viewers globally, with a highly engaged digital audience with over 45 million followers worldwide. The show holds the Guinness World Record for the 'Most Successful Cookery Television Format'.*

The Opponent exploits its formats in a variety of ways, well beyond the original television content. Such additional uses include: cookware; kitchen equipment; kitchen appliances; kitchen utensils and apparatus; knives; chopping boards; aprons; books including cook and recipe books; foodstuffs; and experiential services.

Indeed, it has become common practice for the owners of successful entertainment programming to commercially exploit the popularity of their brands in connection with a wide range of merchandise and/or associated and ancillary services, and the public has come to expect such exploitation.

The Contested Mark is highly similar visually, aurally and conceptually to the Opponent's earlier mark. Many of the goods and services applied for under the Contested Mark are identical or very highly similar to those provided by the Opponent.

Given the significant commercialisation of the format in the UK as described, any use of the Contested Mark would misrepresent to the public that the goods and services offered thereunder originate from or are otherwise economically connected to the Opponent (such as being provided under license from or in collaboration with), when this would not be the case, and that would amount to deception of the relevant public.

Such a misrepresentation is likely to cause damage to the Opponent; for example, due to a loss of sales and/or licensing revenue, or due to harm caused by dissatisfaction with the Applicant's goods, and/or as a result of dilution of the Opponent's brand."

20. The applicant filed a counterstatement in which it denies all of the grounds of opposition and puts the opponent to proof of use for the '654, '733 and '306 marks. It states:

”For section 5(2)(b), the Applicant submits that the trade marks are different, the goods and services are also different. Therefore, a likelihood of confusion, or association, does not exist between the trade marks.

For section 5(3), the Applicant submits that the Opponent does not have a reputation for their trade marks. The Opponent is placed to strict proof of this contention. The use of the Applicant's mark does not take unfair advantage of, nor is detrimental to, the alleged distinctive character or the alleged repute of the earlier trade marks.

For section 5(4)(a), it is denied that that Opponent owns goodwill in their trade marks. The Opponent is placed to strict proof of this contention. The Applicant denies that the use and registration of its mark will lead to a misrepresentation in the marketplace amongst consumers. The Applicant denies that there will be any damage to the Opponent's trade marks.”

The opposition against 3858347

21. UK trade mark number 3858347 was filed on 12 December 2022 (the relevant date). It appears as follows:

MISTERCHEF®

22. The specification is as follows:

MASTERCHEF

Goods relied on for 5(3)

Class 9: downloadable audio and video recordings featuring cooking competition, cooking instruction and recipes; downloadable television shows and video recordings featuring cooking competition, cooking instruction and recipes.

25. Under section 5(2)(b) of the Act the opponent submits that each of the earlier Masterchef marks is highly distinctive, particularly as a result of extensive use throughout the UK and the contested trade mark, MisterChef, is visually, aurally and conceptually highly similar to each of the earlier marks.

26. With regard to the similarity between the competing goods and services, the opponent submits:

‘606 mark

27. The goods are either identical or highly similar; for example, they are all kitchen equipment.

‘306, ‘654 and ‘733 marks

28. The goods are highly similar; for example, they are all kitchen equipment.

‘801 mark

29. The earlier mark covers retail services of kitchen equipment, which is similar to the kitchen equipment goods in classes 7 and 11 covered by the Contested Application.

30. Under the section 5(3) ground of opposition the opponent claims that the similarity between its earlier marks and the application is such that the relevant public will believe the marks are used by the same or an economically connected undertaking.

31. It claims that earlier marks ’733 and ’306 have acquired a reputation in the UK as a result of its extensive and long-standing use in respect of the services relied on in Class 41. The ’348 mark is said to enjoy the same reputation in class 9 and the earlier mark ending 787 in respect of classes 9 and 41.

32. With regard to all four earlier marks relied on under section 5(3) the opponent submits that the contested trade mark (the verbal element of which is MISTERCHEF) is visually, aurally and conceptually highly similar to the earlier Masterchef marks.

33. The opponent claims that all of the earlier marks have a reputation for a highly successful and long-running television programme in the field of cooking and food and entertainment services. Successful television programmes are commonly licensed for a wide range of associated merchandise. The goods covered by the contested application are kitchen equipment, which is a category of products for which the opponent's earlier mark is licensed.

34. The opponent claims that a link would be made between its earlier marks and the contested application because the reputation and enhanced distinctiveness of the earlier trade marks, and the high degree of similarity between the respective marks and the connection between the respective goods and services are such that, if the Contested Trade Mark is used for any of the goods covered, a link will be created in the minds of the relevant public in that the earlier mark will be called to mind.

35. With regard to damage, the opponent claims under all three heads of damage available under section 5(3) of the Act and submits:

> *30. Such a 'link' is likely to cause the average consumer to bestow on the goods marketed under the Contested Trade Mark the same qualities associated with the services provided under the earlier trade mark, attributing the Applicant's goods the high quality associated with the services provided under the earlier mark for which the Opponent enjoys a reputation.*
>
> *31. The Applicant's goods would therefore enjoy a marketing boost for which the Applicant has not paid. Such use would ride on the coat-tails of the Opponent and take unfair advantage of the reputation of the Opponent's earlier trade mark which the Opponent has gained through significant financial investment.*

32. Should there be any poor publicity or consumer feedback arising from the quality of the goods provided by the Applicant under the Contested Trade Mark, the fact that a 'link' would be made by the relevant public to the Opponent's earlier trade mark would be damaging and detrimental to the reputation of the Opponent.

33. The 'link' is also likely to weaken the ability of the earlier trade mark to identify the services from or connected to the Opponent. Such use would therefore dilute the attractive power of the Opponent's earlier trade mark and would be detrimental to the distinctive character of the earlier trade mark and may, in particular, lead to a loss of custom, irrespective of actual confusion.

36. Under section 5(4)(a) of the Act the opponent relies on the sign MASTERCHEF, against all of the goods and services in the application (see annex 1). It claims the sign has been used throughout the UK since 2 July 1990. It claims goodwill in the MASTERCHEF sign for the following:

> Entertainment services, including, a television series in the reality genre in the field of cooking and food; production, presentation and distribution of television programs; audio-visual recordings and downloadable television shows; cookware; kitchen equipment; kitchen appliances; kitchen utensils and apparatus; knives; chopping boards; aprons; books including cook and recipe books; foodstuffs; retail of merchandise products; the licensing of IP rights for merchandise products and experiential services.

37. With regard to its goodwill the opponent’s submissions are the same as pleaded above, in the opposition against 3858347:

”61. The Opponent is part of the Banijay Group, the world's largest independent producer of content, operating with over 130 production labels, across 21 territories, and a multi-genre catalogues of scripted and non-scripted formats with over 160,000 hours of original programming.

62. One of Banijay's core formats is MasterChef which is a competitive cooking television show which has won a Guinness World Record for being the 'Most Successful Cookery Television Format'. It originated in the UK in 1990 but has since spread globally; it is, in fact, the most travelled food format in the world. In 2017 the MasterChef brand celebrated its 200th series production. Now produced in over 60 territories worldwide and broadcast in over 200 territories, MasterChef has been watched globally by over 1 billion viewers. The brand has a highly engaged digital audience with over 45 million followers worldwide.

63. The Opponent owns and/or controls all intellectual property rights, including trade marks in and to the MasterChef format.

64. The Opponent exploits its formats in a variety of ways, well beyond the original television content. Such additional uses include software, a broad array of licensed consumer products including but not limited to cookware, kitchenware, kitchen equipment, kitchen appliances, kitchen utensils and apparatus, knives, chopping boards, aprons, and oven mitts, and cooking books, to name but a few. Indeed, it has become common practice for owners of successful entertainment programming to exploit commercially the popularity of their brands in connection with a wide range of merchandise and/or associated services and ancillary services, and the public has come to expect such exploitation.

65. As a result of this long-standing commercial use of MASTERCHEF, the Opponent has built up protectable goodwill in connection with its business in the UK."

38. And with regard to resulting misrepresentation and damage:

"Misrepresentation

66. Given the significant commercialisation of the MasterChef format in the UK, any use of the Contested Trade Mark would misrepresent to the public that the goods originate from or are otherwise economically connected to

the Opponent (such as being provided under licence), when they would not be.

Damage

67. Such a misrepresentation is likely to cause damage to the Opponent's goodwill; for example, due to a loss of sales and/or licensing revenue, or due to harm caused by dissatisfaction with the Applicant's goods, and/or as a result of dilution."

39. The opponent filed a counterstatement in which it denies the grounds of opposition and asks the opponent to prove use of earlier mark '654, '733 and '306.

40. It states:

"The Applicant submits that the trade marks are dissimilar and the goods and services are dissimilar. Therefore, no likelihood of confusion or association between the trade marks exist.

The Applicant denies that the Opponent's owns a reputation in its MASTERCHEF trade marks. It denies that use of the Applicant's mark would take unfair advantage of, or be detrimental to, the alleged distinctive character or alleged repute of the earlier trade marks.

The Applicant denies that the Opponent owns goodwill in the MASTERCHEF trade marks. The Applicant denies that there will be any misrepresentation amongst consumers or that any damage will occur."

41. The opponent filed evidence. Both sides filed skeleton arguments. A hearing took place before me on 11 March 2025, at which the opponent was represented by Michael Hicks of Counsel, instructed by Wiggin LLP.

42. With regard to the applicant's representation, Trade Marks Wizards Limited (TMWL) was the attorney on record until 21 September 2024, when TMWL wrote to the tribunal stating that they no longer represented the applicant. In a further letter,

dated 24 February 2025, TMWL wrote again to say that they were reappointed as the applicant's representative and would attend the upcoming hearing. The applicant was represented by Jamie Muir Wood of Counsel (instructed by TMWL).

43. I make this decision having taken full account of all the papers before me and the submissions made at the hearing.

44. Although the UK has left the European Union (EU), section 6(3)(a) of the European Union (Withdrawal) Act 2018 requires tribunals to apply EU-derived national law in accordance with EU law as it stood at the end of the transition period. The provisions of the Act relied upon in these proceedings are derived from an EU Directive and, therefore, this decision continues to refer to the trade mark case law of the EU courts.

EVIDENCE

45. The opponent's evidence is provided by Ms Nicole Söhngen in a witness statement and accompanying exhibits NS1–NS35. Ms Söhngen is Senior Legal Counsel for IP and trademarks for Endemol Shine Holding BV (part of the Banijay Group). Ms Söhngen had been employed by Banijay and the Endemol Shine Group (ESG) for fourteen years at the date of her witness statement, which is 28 March 2024.

Points relevant to both opposition cases

<u>The opponent's pleadings</u>

46. The TM7 statement of grounds for these cases is lengthy, resulting in two errors having occurred in the opponent's pleadings. Submissions relating to the goods and services in the specification for trade mark 2563306 and their similarity to the MisterChef application are said to be contained in the continuation sheet to the TM7. They are not.

47. Secondly, the opponent submits that it relies on earlier trade mark 3267851 against some of the services in class 35 of the MisterChef application and states that those are contained in the continuation sheet to its TM7 statement of grounds. They are not.

48. I will return to these points later if necessary.

49. The following paragraphs from Ms Söhngen's statement concern the MASTERCHEF television programme:

> *"14. MASTERCHEF is a cooking television format (or programme) where amateur cooks compete in a series of culinary challenges (the Programme). The Programme is produced in over 65 markets and aired in more than 200 territories and watched by over 300 million viewers worldwide and has transferred over 100 amateur chefs into professionals. In 2017, the Programme was named the "Most Successful Cookery Television Format" by Guinness World Records.[2] In 2022 alone, over 50 separate series of MASTERCHEF were aired across 38 territories worldwide. YouGov UK Ratings data collection shows a 94% recognition of the MASTERCHEF Programme and that it is currently the most popular food and drink television show format of all time amongst British viewers."[3]*

50. And

> *"19. Since 2005, there have been 19 series of MASTERCHEF in the UK, 18 series of Celebrity MASTERCHEF, 15 series of MASTERCHEF: The Professionals, and 3 series of Junior MASTERCHEF. The series are all generally aired annually over multiple weeks. A new SpinOff, Young MASTERCHEF was announced in February 2022 (and aired in 2023)."*

51. Ms Söhngen provides a table showing the minutes aired in the UK of each of the MASTERCHEF TV programmes. In total, they are as follows:

Title:	**Minutes aired (2014-2022)**
MASTERCHEF	232,577

[2] See exhibit NS03
[3] See exhibit NS04

MASTERCHEF JUNIOR	15,604
CELEBRITY MASTERCHEF	89,404
MASTERCHEF THE PROFESSIONALS	162,404

52. Viewing figures have been provided[4] and show that since 2007 there have been almost 5 million viewers on average for each broadcast of the main Masterchef TV programme.[5]

53. The evidence filed clearly shows the Masterchef TV programme has broadcast consistently since 2005 in its current format and has a significant audience for each episode of each version of the show. The versions include Masterchef, Masterchef the professionals, Celebrity Masterchef and more recently, Junior Masterchef. I accept that the opponent has substantial use, reputation and goodwill in its MASTERCHEF brand for a television series that takes the form of a cooking competition (services in class 41).

Evidence of use and merchandising of the MASTERCHEF trade marks

54. The opponent is required to prove use of its marks for goods in classes 8 and 21. In addition, throughout the opponent's case it relies on a claimed high level of merchandising of the MASTERCHEF trade marks, which it says enhances its case under all three of the grounds pleaded against both contested applications.

55. I will deal briefly with the opponent's evidence. Ms Söhngen's evidence relating to merchandising, which is relevant for use, goodwill and the opponent's broader claims is taken, primarily, from two internal documents, 'Masterchef Brand and Creative Update 2022'[6] and 'MasterChef Brand Licensing Overview 2019';[7] two websites, one being the MasterChef store on Amazon and the other being www.masterchef.com; and press articles and awards. Ms Söhngen provides details of the number of units sold in the UK between 2020 and 2022, for a range of MASTERCHEF goods. These appear to have

[4] See exhibit NS08
[5] See Ms Söhngen's witness statement, paragraph 28.
[6] See exhibit NS07
[7] See exhibit NS32

been taken from royalty reports provided in evidence that have been heavily redacted to the extent that only the units sold remain visible.[8]

Product	**Units sold**
Cutlery	2,237
Kitchen knives	41,108
Knife boards	5,539
Knife sharpeners, tools	1,292
Pots, lids for pots	4,922
Kitchen utensils (inc. slotted spoons, spatulas and turners)	6,213

56. Ms Söhngen provides a list of 19 partners who do provide or have provided 'MASTERCHEF' licensed goods between 1 April 2011 and 31 December 2026.

57. Example pages are provided from the MASTERCHEF online shop at Amazon UK[9] and the MASTERCHEF website.[10] Goods shown include, inter alia, pots and pans, knives, chopping boards, aprons, oven gloves, tea towels, utensil sets, a hand blender and an air fryer. Prices are shown next to the goods, for example, a 'pancake pan' on the Amazon store is £18.21 and a 'natural kitchenware set' that includes pots, pans, utensils, a chopping board and a set of a knives is £143.91 on the MASTERCHEF web store. Similar goods are shown for sale on Wayfair, though the page is not dated. Ms Söhngen states that 'such products have been sold in the UK since, at least, Q4 2018'.

58. Ms Söhngen's witness statement includes the following:

> *"24. The MASTERCHEF Programme and associated commercialisation generates significant revenues for Banijay. These figures are confidential but suffice to say that the MASTERCHEF Programme is one of the biggest brands owned by Banijay and the UK is the home market and longest running territory for the MASTERCHEF Programme."*

[8] See exhibit NS35
[9] See exhibit NS33
[10] See exhibit NS33

Conclusions from the evidence

59. In an effort to keep all of its figures confidential the opponent has redacted documents to the extent that meaningful information has often been removed. No turnover figures have been provided and there is no information about the size of the relevant markets nor any examples of invoices, or actual sales made.

60. Press materials relate to the television programme, its presenters and contestants, rather than any of the MASTERCHEF branded goods. Awards relate to the television programme and its hosts.

61. With regard to goods bearing the MASTERCHEF brand, items such as tea, wine, food-based gift sets and barbeques appear in the internal licencing documents but there is no evidence to show that they have been offered for sale, no figures have been provided or invoices supplied that show sales were actually made.

62. Where goods are shown as at least available to purchase, the 'storefront' website pages are not dated.

63. The table of 'units sold' between 2020 and 2022 for a range of kitchenware goods amounts to very small numbers of goods, with the exception of kitchen knives.

64. It is not always clear which goods have been sold in the particular categories. For example, Ms Söhngen states that 2,237 units of cutlery have been sold. Examples of cutlery that Ms Söhngen has shown in her witness statement and the few that are pictured on undated website pages relate only to steak knives. There is no evidence of sales of any other 'cutlery'. I do not have any evidence of the size of the market but I would expect 2,237 items of cutlery over a two-year period to be very small within that market. The same is true of 'knife sharpeners, tools'. Knife sharpeners are the only goods shown in the 'tools' category and again, the numbers sold are small, there is no indication of the size of the market and no supporting invoices.

65. The figures for the goods in the table, other than kitchen knives, are not sufficient and whilst I do not dispute that some sales of MASTERCHEF branded goods may have taken place, evidence of the type supplied by the opponent has made it very difficult for me to identify which of those goods have been sold or assess the level of sales made in the relevant periods for the claimed categories.

66. With regard to kitchen knives, I have no indication of the size of the market, which I presume is large, but 41,108 knives over a two-year period, along with the website evidence, is just sufficient for me to find that the opponent has shown genuine use of the Masterchef trade mark for knives between 2020 and 2022. The evidence does not reach the necessary threshold for enhanced distinctive character nor does it establish a reputation for these goods.

67. For the remaining goods, I rely on *Awareness Limited v Plymouth City Council*,[11] in which Mr Daniel Alexander Q.C. (as he then was) as the Appointed Person stated that:

> "22. The burden lies on the registered proprietor to prove use..... However, it is not strictly necessary to exhibit any particular kind of documentation, but if it is likely that such material would exist and little or none is provided, a tribunal will be justified in rejecting the evidence as insufficiently solid. That is all the more so since the nature and extent of use is likely to be particularly well known to the proprietor itself. A tribunal is entitled to be sceptical of a case of use if, notwithstanding the ease with which it could have been convincingly demonstrated, the material actually provided is inconclusive. By the time the tribunal (which in many cases will be the Hearing Officer in the first instance) comes to take its final decision, the evidence must be sufficiently solid and specific to enable the evaluation of the scope of protection to which the proprietor is legitimately entitled to be properly and fairly undertaken, having regard to the interests of the proprietor, the opponent and, it should be said, the public."

[11] Case BL O/236/13

68. Given the level of use of the MASTERCHEF marks that the opponent has claimed to have made on its own account and through licence partners, it should have been a simple matter to provide the necessary evidence. The opponent has not done so. The evidence provided is neither solid nor specific enough for me to make an evaluation regarding the extent of use, reputation and goodwill in the MASTERCHEF marks for the goods relied upon, except kitchen knives.

69. With regard to the general practice of merchandising, Ms Söhngen provides prints from the internet for TV shows such as, inter alia, Doctor Who, Breaking Bad, Stranger Things and Game of Thrones, as well as Superman, Batman and Harry Potter.[12] I do not find these helpful, beyond a general indication that some TV shows sell related merchandise.

70. Ms Söhngen also provides prints related to cooking TV shows such as Hairy Bikers and Great British Bake Off. The format of The Hairy Bikers is different to Masterchef, being about travel and recipes, rather than taking the form of a competition. In that respect, Great British Bake Off is closer, in terms of format, to the MASTERCHEF programmes.[13]

71. The prints for Great British Bake Off are taken from Amazon and were printed after the relevant date. They show 'The Great British Bake Off biscuit set; Great British Bake Off' mini and large loaf tins, a Great British Bake Off zester and a Great British Bake Off cake stand. Also shown is a 'GBBO' cooking set, a 'GBBO' baking mat and a 'GBBO' apron. I cannot see 'Great British Bake Off' or GBBO applied to any of the items themselves and they are not dated. Further, undated, pages are taken from Cancer Research UK and relate to the 'Great Stand Up To Cancer Bake Off'. Items shown include, aprons, a chef's hat, tea towels, an oven glove, a cake stand and slice and a 'bake sale kit'. Each item features the words 'STAR BAKER' and makes no other reference to the Great British Bake Off. There is no evidence of sales being made for any of the featured items, on either site. The evidence comprises internet prints, dated after the relevant date, with no indication of the size of the market for such goods.

[13] See exhibit NS31

The MASTERCHEF trade marks

72. Across the two oppositions and the various grounds relied upon, the opponent relies on eight earlier MASTERCHEF marks.

- The MASTERCHEF trade marks have substantial use, reputation and goodwill in for a television series that takes the form of a cooking competition (services in class 41).
- Trade marks 2563306, 906952733 and 2118654 have just satisfied the use requirement in respect of kitchen knives. They do not benefit from enhanced distinctive character, nor do they have a reputation for the same goods.

73. I shall refer to the marks as the MASTERCHEF marks, unless I am discussing an individual mark where I shall refer to it in the way it appears on the UK trade mark register.

Previous cases between the parties

74. BL O/228/18 was decided by Allan James and concerns the MISTER CHEF mark with the hat device that is also opposed in these proceedings. It was appealed and was heard by Mrs Justice Joanna Smith DBE. The decision, *Shine TV Ltd v SKS Trading Ltd (in substitution for Mr Chef Limited)* [2022 EWHC 3156 (Ch), was handed down on 15 December 2022. To the extent that it is relevant to the matters before me, I will bear it in mind, whilst being mindful that each case must be decided on its own facts.

THE DECISION

75. I will deal first with the opposition against trade mark 3858347 under opposition number 440252 and the opponent's case under section 5(2)(b) of the Act.

Section 5(2)(b) legislation and case law

76. Section 5(2)(b) of the Act reads:

> "5. - (2) A trade mark shall not be registered if because -
>
> (a)…
>
> (b) it is similar to an earlier trade mark and is to be registered for goods or services identical with or similar to those for which the earlier trade mark is protected, or there exists a likelihood of confusion on the part of the public, which includes the likelihood of association with the earlier trade mark."

77. The following standard summary of the principles applicable to the assessment of the likelihood of confusion was approved by the Supreme Court in *Iconix Luxembourg Holdings SARL v Dream Pairs Europe Inc & Anor*, [2025] UKSC 25:

> (a) the likelihood of confusion must be appreciated globally, taking account of all relevant factors;
>
> (b) the matter must be judged through the eyes of the average consumer of the goods or services in question, who is deemed to be reasonably well informed and reasonably circumspect and observant, but who rarely has the chance to make direct comparisons between marks and must instead rely upon the imperfect picture of them he has kept in his mind, and whose attention varies according to the category of goods or services in question;
>
> (c) the average consumer normally perceives a mark as a whole and does not proceed to analyse its various details;
>
> (d) the visual, aural and conceptual similarities of the marks must normally be assessed by reference to the overall impressions created by the marks bearing in mind their distinctive and dominant components, but it is only when all other components of a complex mark are negligible that it is

permissible to make the comparison solely on the basis of the dominant elements;

(e) nevertheless, the overall impression conveyed to the public by a composite trade mark may, in certain circumstances, be dominated by one or more of its components;

(f) and beyond the usual case, where the overall impression created by a mark depends heavily on the dominant features of the mark, it is quite possible that in a particular case an element corresponding to an earlier trade mark may retain an independent distinctive role in a composite mark, without necessarily constituting a dominant element of that mark;

(g) a lesser degree of similarity between the goods or services may be offset by a greater degree of similarity between the marks, and vice versa;

(h) there is a greater likelihood of confusion where the earlier mark has a highly distinctive character, either per se or because of the use that has been made of it;

(i) mere association, in the strict sense that the later mark brings the earlier mark to mind, is not sufficient;

(j) the reputation of a mark does not give grounds for presuming a likelihood of confusion simply because of a likelihood of association in the strict sense; and

(k) if the association between the marks creates a risk that the public might believe that the respective goods or services come from the same or economically linked undertakings, there is a likelihood of confusion.

Comparison of goods

78. The application is made in classes 7 and 11. The opponent relies on five earlier trade marks, none of which is registered in class 7. The opponent's earlier mark 3596606 (the '606 mark) for MASTERCHEF is registered in class 11 and is not subject to proof of use requirements as it had not been registered for five years at the date the contested mark was filed, on 12 December 2022.

79. The applicant accepts that the class 11 goods in the application are highly similar or identical to the class 11 goods for which the '606 Mark is registered. It also accepts that the class 7 goods are complementary to the class 35 services for which the '801 Mark is registered.[14] The '801 mark is not subject to proof of use.

80. The applicant's goods in class 11 are types of 'apparatus and installations for cooking', which is the first term in the opponent's class 11 specification for the '606 mark. Accordingly, the specifications in class 11 are identical. [15]

81. I will proceed on the basis of these identical goods.

The average consumer

82. The average consumer is deemed to be reasonably well informed and reasonably observant and circumspect. For the purposes of assessing the likelihood of confusion, it must be borne in mind that the average consumer's level of attention is likely to vary according to the category of goods or services in question: *Lloyd Schuhfabrik Meyer*, Case C-342/97.

83. In *Iconix Luxembourg Holdings SARL v Dream Pairs Europe Inc & Anor*, [2025] UKSC 25, the Supreme Court approved the comments of Arnold LJ in *Lidl Great Britain Ltd & Anor v Tesco Stores Ltd & Anor* (Rev1) [2024] EWCA Civ 262, where he pointed out that:

[14] See the applicant's skeleton argument at paragraph 41
[15] See *Meric*

(a) Consumers who are ill-informed or careless, or consumers with specialised knowledge or who are excessively careful are excluded from consideration;

(b) The average consumer provides a standard which enables the courts to strike a balance between the competing interests involved, such as trade mark owners, their competitors and consumers;

(c) The average consumer is neither a single hypothetical person nor a mathematical average; assessment from the perspective of the average consumer does not involve a statistical test. There is no single meaning rule and if, having regard to the perceptions and expectations of the average consumer, the court considers that a significant proportion of the relevant public is likely to be confused, a finding of infringement may properly be made;

(d) Assessment from the perspective of the average consumer is intended to facilitate adjudication of trade mark disputes by providing an objective criterion, by promoting consistency of assessment and by enabling courts and tribunals to determine such issues so far as possible without the need for evidence;

(e) The average consumer's level of attention varies according to the category of goods or services in question; and

(f) the average consumer rarely has the opportunity to make direct comparisons between trade marks (or between trade marks and signs) and must instead rely upon the imperfect picture of the trade mark they have kept in their mind.

84. In its skeleton argument the opponent submits:

"30. For most of the goods and services the average consumer is or at least

includes a member of the general public, particularly one interested in cooking. Such persons will have an average degree of attention.

31. To the extent that there are any goods or services where the average consumer is different, there is no reason to assume that their attention will be anything other than average."

85. In its skeleton argument the applicant submits:

"48. The average consumer will be a member of the public paying a medium degree of attention to the origin of the goods and services, depending on price. In respect of more expensive goods and services targeted at chefs or restaurateurs, the cost is likely to be higher and thus the degree of attention higher."

86. The goods are likely to be bought by members of the general public or professionals. Some cooking appliances are fairly low-cost consumer items and some will be expensive professional items, such as ranges of ovens for professional kitchens. In all cases, the purchases are fairly infrequent and will be primarily visual, being made from a website, catalogue or showroom, though there may be a verbal element where advice is sought prior to purchase. The attention paid will vary but will be at least medium, as the purchaser will need to ensure the goods are suitable for their purposes.

.

Comparison of the marks

87. It is clear from *Sabel BV v. Puma AG* (particularly paragraph 23) that the average consumer normally perceives a mark as a whole and does not proceed to analyse its various details. The same case also explains that the visual, aural and conceptual similarities of the marks must be assessed by reference to the overall impressions created by the marks, bearing in mind their distinctive and dominant components. The respective trade marks are shown below:

The opponent's mark:	The applicant's mark:
MASTERCHEF	

88. The earlier mark is MASTERCHEF. It is presented in upper case with no additional stylisation. The overall impression rests in the whole mark.

89. The contested application has a device at the top, which will be seen as a chef's hat. The word below is MISTERCHEF. It will be clear to the average consumer that the word is made up of MISTER and CHEF and this is reinforced by the fact that the CHEF part of the text is presented in bold. The device element plays a role in the overall impression of the mark, being quite large and at the top of the trade mark. However, it is lower in distinctiveness as it simply reinforces the 'chef' message. The R in a circle is small and denotes a registered trade mark. It plays a negligible role in the overall impression of the mark, if it is noticed at all. Overall, the device plays a lesser role in the mark as, despite its size and position, it is lowly distinctive. The words play the larger role in the mark.

Visual and aural comparison

90. The parties agree that the competing marks are visually and aurally similar. The applicant says, 'to an above average degree' and the opponent says they are, 'highly similar'.

91. I agree, the marks are visually and aurally similar to an above average degree.

Conceptual similarity

92. The parties disagree about the conceptual meanings of the competing trade marks.

93. The opponent submits:

> *"21*
> *(1)…*
>
> *(2) Conceptually MASTERCHEF and MisterChef (or MISTERCHEF) share the concept of the title of a male, followed by the word chef. Furthermore, by reason of its extensive use, MASTERCHEF has come to denote Shines TV programme. Whatever meaning MASTERCHEF might have had decades ago has long since been superseded by the meaning acquired by use—it is, quite simply, the name of Shine's Programme and its Spin-Offs."*

94. The applicant submits:

> *"56. Conceptually, the signs differ. The Earlier Marks will be seen to refer to an expert cook. The Applications point to an individual called 'Mr Chef'. They are conceptually different."*

95. I have not been provided with any dictionary definitions for MISTER or MASTER by the parties. In my view, MISTERCHEF will be seen as the full version of MR CHEF, in other words, a male title followed by CHEF. MASTERCHEF will, prima facie, be seen as someone skilled at being a chef, a 'master' chef.

96. The opponent's second submission is that whatever the meaning of MASTERCHEF might have been in the past, the meaning has been superseded by use made of MASTERCHEF by the opponent, to the extent that MASTERCHEF is, as the opponent puts it *'quite simply, the name of Shine's Programme and its Spin-Offs'.*

97. In *Retail Royalty Company v Harringtons Clothing Limited*,[16] Phillip Harris, as the Appointed Person, considered the argument that the letters 'AE' had, through their use, acquired an independent conceptual significance that would mean that the

[16] O/593/20

average consumer would always perceive them as meaning ‘AMERICAN EAGLE’. He said:

> “74. The Opponent is trying to equate reputation in a trade mark sense with conceptual meaning. They are not the same thing. Reputation can mean different things, and in trade mark law the term is sometimes used loosely, but in this context, it concerns the factual extent to which a sign is recognised by a significant part of the public *as a trade mark* [original emphasis].
>
> 75. In contrast conceptual meaning is, in simple terms, something akin to recognition in dictionaries (beyond a mere trademark acknowledgement) or a level of immediately perceptible notoriety/independent meaning, outside the confines of a purely trade mark context, of which judicial notice can be taken. Whilst a trade mark’s reputation might evolve or be converted into a conceptual meaning (possibly to its detriment in terms of genericity), it needs to be properly proven.

98. In this case I have accepted, on judicial notice, that the opponent uses its MASTERCHEF mark for a very well-known television programme that relates to cooking competitions. This does not help the opponent. The concept of the opponent’s mark is unaltered by its fame. A consumer encountering the opponent’s trade mark without the knowledge of the television programme will see MASTERCHEF as referring to a skilled chef. There is, in my experience, a long tradition of industries where the word MASTER before a role indicates that the person has achieved a high level of skill, for example, Master Builder, Master Carpenter and so on. This does not change when the consumer is familiar with the opponent’s television programme. Such a consumer will also see the opponent’s mark as referring to a skilled chef, particularly as those competing in MASTERCHEF on television are trying to become exactly that, skilled chefs. The opponent’s notoriety reinforces the message, it does not point away from it.

99. I find the parties’ marks conceptually different.

Distinctive character of the earlier mark

100. In *Lloyd Schuhfabrik*, the Court of Justice of the European Union (CJEU) said, at [22], that the court must make an overall assessment of a mark's capacity to distinguish the goods or services of one undertaking from those of others. It continued:

> "23. In making that assessment, account should be taken, in particular, of the inherent characteristics of the mark, including the fact that it does or does not contain an element descriptive of the goods or services for which it has been registered; the market share held by the mark; how intensive, geographically widespread and long-standing use of the mark has been; the amount invested by the undertaking in promoting the mark; the proportion of the relevant section of the public which, because of the mark, identifies the goods or services as originating from a particular undertaking; and statements from chambers of commerce and industry or other trade and professional associations (see Windsurfing Chiemsee, paragraph 51)."

101. Registered trade marks possess varying degrees of inherent distinctive character from the very low, because they are suggestive of, or allude to, a characteristic of the goods or services, to those with high inherent distinctive character, such as invented words that have no allusive qualities. The distinctiveness of the mark can be enhanced by the use that has been made of it.

102. The earlier trade mark is MASTERCHEF. CHEF is highly allusive for cooking apparatus that can be used by chefs to cook food. The addition of MASTER does not make it any less so, as the whole mark alludes to cooking goods that are fit for an expert chef. The mark has a low degree of inherent distinctiveness.

103. In its skeleton argument the opponent claims that its earlier MASTERCHEF marks have an enhanced distinctive character so far as they concern "Merchandise of the kind described in [the opponent's] evidence". I have already explained why the opponent's evidence does not help it in this regard.

104. Therefore, the distinctiveness of the earlier mark rests on its inherent distinctiveness alone.

Likelihood of confusion

105. In assessing the likelihood of confusion, I must adopt the global approach advocated by case law and take into account the fact that marks are rarely recalled perfectly, the consumer relying instead on the imperfect picture of them that they have kept in mind. I must also keep in mind the average consumer for the goods and services, the nature of the purchasing process and have regard to the interdependency principle i.e. a lesser degree of similarity between the respective trade marks may be offset by a greater degree of similarity between the respective goods and services and vice versa.

106. I have found the following:

- the goods are identical in class 11
- the marks are visually and aurally similar to an above average degree
- the marks are conceptually different
- the average consumer is a member of the general public or a professional
- the purchase is primarily visual, though there may be a verbal element where advice is sought prior to purchase
- The attention paid will vary but will be at least medium
- the earlier mark has a low degree of inherent distinctiveness for goods in class 11

107. The visual differences are at the beginning of the marks, namely the hat device above the word MISTERCHEF in the application and the different second letter in each of the words. As a general rule this means that they are more likely to be noticed than differences that occur later in the competing marks.[17] With regard to the different

[17] El Corte Inglés, SA v OHIM, the General Court, Cases T-183/02 and T184/02

concepts, it is clear from case law that in some circumstances conceptual differences can counteract visual and aural similarities,[18] but that is not always the case.[19]

108. Confusion may be direct or indirect. The two types of confusion were explained by Mr Iain Purvis QC, as the Appointed Person, in *LA Sugar Limited v Back Beat Inc.*,[20] as follows:

> "16. Although direct confusion and indirect confusion both involve mistakes on the part of the consumer, it is important to remember that these mistakes are very different in nature. Direct confusion involves no process of reasoning – it is a simple matter of mistaking one mark for another. Indirect confusion, on the other hand, only arises where the consumer has actually recognized that the later mark is different from the earlier mark. It therefore requires a mental process of some kind on the part of the consumer when he or she sees the later mark, which may be conscious or subconscious but, analysed in formal terms, is something along the following lines: "The later mark is different from the earlier mark, but also has something in common with it. Taking account of the common element in the context of the later mark as a whole, I conclude that it is another brand of the owner of the earlier mark."

109. Having considered all of the relevant factors, the visual differences, small as they are, are counteracted by the fact that both parties' marks have a low degree of distinctiveness for cooking apparatus and the concepts of the marks are clearly different. The common element is 'CHEF', which is very low in distinctiveness for the relevant goods and the additional elements, MISTER (and the chef hat device) and MASTER in the earlier mark provide a clearly different concept which results in differences that are sufficient to avoid a likelihood of direct confusion. There is also nothing about the competing marks that would lead the average consumer to think that the two brands were linked in a way that would result in a likelihood of indirect confusion. Whilst I have found the purchase to be primarily visual, I do not rule out an

[18] Picasso Estate v OHIM, CJEU, Case C-361/04 P at paragraph 20
[19] Nokia Oyj v OHIM, the General Court, Case T-460/07
[20] BLO/375/10

aural element and have considered whether it would be a factor where the marks are misheard. The different meanings of the marks point away from that and the likelihood of them being imperfectly recollected. This would be the case even at the lower, medium, level of attention.

110. The opposition fails under section 5(2)(b) against class 11 of the contested application. None of the other earlier marks relied on would put the opponent in a better position in relation to this class as they are all, essentially, the same MASTERCHEF mark and the distance between the goods and services is greater.

The application in class 7

111. The opponent does not have any earlier MASTERCHEF marks registered in class 7. The high point of any similarity between its marks and the application would be the complementary relationship between class 7 of the application and retail services for 'cooking apparatus' in the earlier mark MASTERCHEF (3703801) (the applicant has accepted this point). At best, this would give rise to a low degree of similarity between the applicant's goods and the opponent's services. The opposition having failed against class 11 for identical goods, the opponent can be in no better position with regard to its opposition against the application in class 7.

112. Consequently, the opposition fails in full under section 5(2)(b) of the Act.

The opposition under section 5(3)

113. Section 5(3) of the Act reads as follows:

> "A trade mark which-
> (a) is identical with or similar to an earlier trade mark,
> […]
> shall not be registered if, or to the extent that, the earlier trade mark has a reputation in the United Kingdom and the use of the later mark without due cause would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the earlier trade mark".

114. The conditions of section 5(3) are cumulative. Firstly, the marks at issue must be identical or similar. Secondly, the opponent must satisfy me that the earlier mark has achieved a level of knowledge/reputation amongst a significant part of the relevant public. Thirdly, it must be established that the level of reputation and the similarities between the marks will cause the public to make a link between them, in the sense of the earlier marks being brought to mind by the application. Fourthly, assuming that the first three conditions have been met, section 5(3) requires that one or more of the three types of damage claimed will occur. It is unnecessary for the purposes of section 5(3) that the goods/services be similar, although the relative distance between them is one of the factors that must be assessed in deciding whether the public will make a link between the marks.

Reputation

115. In *General Motors Corp v Yplon SA*,[21] the CJEU held that:

> "24. The public amongst which the earlier trade mark must have acquired a reputation is that concerned by that trade mark, that is to say, depending on the product or services marketed, either the public at large or a more specialised public, for example traders in a specific sector.
>
> 25. It cannot be inferred from either the letter or the spirit of Article 5(2) of the Directive that the trade mark must be known by a given percentage of the public so defined.
>
> 26. The degree of knowledge required must be considered to be reached when the earlier mark is known by a significant part of the public concerned by the products or services covered by that trade mark.
>
> 27. In examining whether this condition is fulfilled, the national court must take into consideration all the relevant facts of the case, in particular the

[21] Case C-375/97

market share held by the trade mark, the intensity, geographical extent and duration of its use and the size of the investment made by the undertaking in promoting it.

28. Territorially, the condition is fulfilled when, in the terms of Article 5(2) of the Directive, the trade mark has a reputation 'in the Member State'. In the absence of any definition of the Community provision in this respect, a trade mark cannot be required to have a reputation 'throughout' the territory of the Member State. It is sufficient for it to exist in a substantial part of it."

116. In its skeleton argument the opponent submits:

"20. There can be no dispute that, by the dates of the opposed applications, the […] earlier marks relied upon by Shine for this ground of opposition had the benefit of a massive reputation. This is not a case where the evidence of reputation just gets over the low bar for a section 5(3) objection."

117. The opponent relies on services in class 41 for its earlier trade marks 906952733, 2563306 and 3703787. As noted above, I accept that at the relevant date the opponent had a substantial reputation for "a television series in the reality genre in the field of cooking and food and presentation of competitions, games and studio entertainment," in class 41. The opponent also relies on class 9 of the '787 mark. To the extent that the goods in class 9 include downloadable versions of the MASTERCHEF television programme, I accept the opponent's reputation exists for those goods.

118. The relevant case law can be found in the following judgments of the CJEU: Case C-375/97, General Motors, Case C-252/07, Intel, Case C-408/01, Adidas-Salomon, Case C-487/07, L'Oreal v Bellure and Case C-323/09, Marks and Spencer v Interflora and Case C-383/12P, Environmental Manufacturing LLP v Office for Harmonization in the Internal Market (OHIM). The law appears to be as follows:

(a) The reputation of a trade mark must be established in relation to the relevant section of the public as regards the goods or services for which the mark is registered; General Motors, paragraph 24.

(b) The trade mark for which protection is sought must be known by a significant part of that relevant public; General Motors, paragraph 26.

(c) It is necessary for the public when confronted with the later mark to make a link with the earlier reputed mark, which is the case where the public calls the earlier mark to mind; Adidas Saloman, paragraph 29 and Intel, paragraph 63.

(d) Whether such a link exists must be assessed globally taking account of all relevant factors, including the degree of similarity between the respective marks and between the goods/services, the extent of the overlap between the relevant consumers for those goods/services, and the strength of the earlier mark's reputation and distinctiveness; Intel, paragraph 42.

(e) Where a link is established, the owner of the earlier mark must also establish the existence of one or more of the types of injury set out in the section, or there is a serious likelihood that such an injury will occur in the future; Intel, paragraph 68; whether this is the case must also be assessed globally, taking account of all relevant factors; Intel, paragraph 79.

(f) the more immediately and strongly the earlier mark is brought to mind by the later mark, the greater the likelihood that use of the latter will take unfair advantage of, or will be detrimental to, the distinctive character or the repute of the earlier mark; L'Oreal v Bellure NV, paragraph 44.

(g) Detriment to the distinctive character of the earlier mark occurs when the mark's ability to identify the goods/services for which it is registered is weakened as a result of the use of the later mark, and requires evidence of a change in the economic behaviour of the average consumer of the goods/services for which the earlier mark is registered, or a serious risk that this will happen in future; Intel, paragraphs 76 and 77 and Environmental Manufacturing, paragraph 34.

(h) The more unique the earlier mark appears, the greater the likelihood that the use of a later identical or similar mark will be detrimental to its distinctive character; Intel, paragraph 74.

(i) Detriment to the reputation of the earlier mark is caused when goods or services for which the later mark is used may be perceived by the public in such a way that the power of attraction of the earlier mark is reduced, and occurs particularly where the goods or services offered under the later mark have a characteristic or quality which is liable to have a negative impact of the earlier mark; L'Oreal v Bellure NV, paragraph 40. The stronger the reputation of the earlier mark, the easier it will be to prove that detriment has been caused to it; L'Oreal v Bellure NV, paragraph 44.

(j) The advantage arising from the use by a third party of a sign similar to a mark with a reputation is an unfair advantage where it seeks to ride on the coat-tails of the senior mark in order to benefit from the power of attraction, the reputation and the prestige of that mark and to exploit, without paying any financial compensation, the marketing effort expended by the proprietor of the mark in order to create and maintain the mark's image. This covers, in particular, cases where, by reason of a transfer of the image of the mark or of the characteristics which it projects to the goods identified by the identical or similar sign, there is clear exploitation on the coat-tails of the mark with a reputation (Marks and Spencer v Interflora, paragraph 74 and the court's answer to question 1 in L'Oreal v Bellure).

The degree of similarity between the conflicting marks

119. The similarity of signs under sections 5(2)(b) and 5(3) of the Act is assessed in the same way.[22]

[22] See the principles established in *Sabel BV v Puma AG*, Case C-251/95, *Canon Kabushiki Kaisha v Metro-Goldwyn-Mayer Inc*, Case C-39/97, *Lloyd Schuhfabrik Meyer & Co GmbH v Klijsen Handel B.V.* Case C-342/97, *Marca Mode CV v Adidas AG & Adidas Benelux BV*, Case C-425/98, *Matratzen Concord GmbH v OHIM,* Case C-3/03, *Medion AG v. Thomson Multimedia Sales Germany & Austria GmbH,* Case C-120/04, *Shaker di L. Laudato & C. Sas v OHIM*, Case C-334/05P and *Bimbo SA v OHIM*, Case C-591/12P.

120. I have found the competing marks to be have above average similarity visually and aurally, but have found them to be conceptually dissimilar.

The nature of the goods or services for which the conflicting marks were registered, or proposed to be registered, including the degree of closeness or dissimilarity between those goods or services, and the relevant section of the public

121. The goods in the specification of the contested application are dissimilar to the entertainment services for which the opponent has a reputation, though they are both connected to cooking in the sense that the applicant's goods are used to cook and cooking is the subject of the opponent's entertainment services and related class 9 goods. Accordingly, the users of the goods are likely to be aware of the entertainment services.

The strength of the earlier mark's reputation

122. The earlier MASTERCHEF mark has a substantial reputation for the entertainment services (and related class 9 goods) I have identified above.

The degree of the earlier mark's distinctive character, whether inherent or acquired through use

123. The inherent distinctive character of the earlier mark MASTERCHEF mark is very low for entertainment services that take the form of a TV show that identifies and develops talented chefs. In that context it is highly allusive if not descriptive. However, extensive use of the mark for entertainment services in the form of a TV show has elevated it to at least a medium degree of distinctiveness.

Whether there is a likelihood of confusion

124. Whether or not there is a likelihood of confusion is one factor in the assessment and is not necessarily decisive, though if there is a likelihood of confusion there is bound to be a link made in the mind of the relevant public. In this case, the differences

between the marks and the competing goods and services are sufficient to avoid a likelihood of confusion.

125. The opponent seeks to rely on a general practice of merchandising in relation to television programmes and its own merchandising of MASTERCHEF goods as a factor that would increase the likelihood of the public expecting MisterChef goods to be connected to the MASTERCHEF programme. It submits the following in its skeleton argument:

> *"MisterChef must be some spin off of MASTERCHEF or associated with it in some way, and all the goods and services must either derive from the makers of the Programme and the Spin-Offs or be provided under licence…*
>
> *The uncontroverted evidence establishes that merchandising is common practice for successful TV programmes (and films) and average consumers will be familiar with that practice. Moreover, MASTERCHEF has in fact been exploited by merchandising."*

126. The opponent's claim that the established practice of merchandising goods would lead the relevant public to make a connection between MisterChef goods and the MasterChef TV show is not accepted because the opponent's evidence falls a long way short of establishing that at the relevant date the UK public would have been sufficiently aware of the merchandising of MASTERCHEF goods. The opponent's evidence is also not persuasive with regard to third party merchandising, as it comprises internet prints, after the relevant date, with no indication of the size of the market for such goods.

127. Having considered all of the competing factors, there will not be any link made between the applicant's MISTERCHEF mark with a hat device, used for a range of kitchen appliances and apparatus and the opponent's MASTERCHEF mark, used for an entertainment service in the form of a TV show. Unless there is a link made between the marks, there can be no damage and so, the opposition under section 5(3) fails.

The opposition under section 5(4)(a)

128. Section 5(4)(a) of the Act reads as follows:

> "(4) A trade mark shall not be registered if, or to the extent that, its use in the United Kingdom is liable to be prevented-
>
> (a) by virtue of any rule of law (in particular, the law of passing off) protecting an unregistered trade mark or other sign used in the course of trade, where the condition in subsection (4A) is met,
>
> (aa) …..
>
> (b) …..
>
> A person thus entitled to prevent the use of a trade mark is referred to in this Act as the proprietor of an "earlier right" in relation to the trade mark."

129. In *Discount Outlet v Feel Good UK*, [2017] EWHC 1400 IPEC, Her Honour Judge Melissa Clarke, sitting as a deputy Judge of the High Court, conveniently summarised the essential requirements of the law of passing off as follows:

> "55. The elements necessary to reach a finding of passing off are the 'classical trinity' of that tort as described by Lord Oliver in the Jif Lemon case (Reckitt & Colman Product v Borden [1990] 1 WLR 491 HL, [1990] RPC 341, HL), namely goodwill or reputation; misrepresentation leading to deception or a likelihood of deception; and damage resulting from the misrepresentation. The burden is on the Claimants to satisfy me of all three limbs.
>
> 56. In relation to deception, the court must assess whether "a substantial number" of the Claimants' customers or potential customers are deceived, but it is not necessary to show that all or even most of them are deceived (per Interflora Inc v Marks and Spencer Plc [2012] EWCA Civ 1501, [2013] FSR 21)."

130. The opponent relies on its claimed goodwill for:

- Entertainment services, namely, a television series in the reality genre in the field of cooking and food;
- production, presentation and distribution of television programs;
- audio-visual recordings and downloadable television shows;
- associated merchandise, including cookware, kitchen appliances, kitchen utensils and apparatus, knives, chopping boards, aprons, and oven mitts, and cook books;
- the licensing of IP rights for merchandise products.

131. Clearly, the opponent has substantial goodwill in the MASTERCHEF sign for services related to the television programme. The opponent's goodwill also extends to downloadable episodes of the television programme. As discussed above, there is insufficiently solid evidence for me to conclude that the opponent had the necessary goodwill for associated merchandise, with the exception of knives, for which I have accepted use has been shown.

132. With regard to the licensing of IP rights, the opponent has provided a table of licence partners that it has had agreements with. This is not evidence that the opponent has provided an IP licensing service under the MasterChef sign.

133. I have found that, at the relevant date, the opponent had a substantial reputation in the UK in relation to a television series in the form of a cooking competition. I am satisfied that the opponent also had sufficient goodwill in the sign 'MASTERCHEF' to bring an action for passing off. However, due to the differences between the marks, particularly their concepts and the different fields of activity in which they operate I find that use of the applied-for mark would not have resulted in the necessary misrepresentation. Without misrepresentation there cannot be damage. The opposition fails under section 5(4)(a) of the Act.

The opposition against 3880617

134. I have already outlined section 5(2)(b) of the Act and the standard case law relevant to section 5(2)(b) at paragraphs 62 and 63 above.

Comparison of goods

135. The application is made in classes 7, 8, 11, 16, 21, 25, 30, 31, 35 and 41 with a specification that runs to 97 pages and is contained in annex 1 of this decision.

136. The opponent relies on seven earlier trade marks under this ground, none of which is registered in classes 7, 25 or 31.

137. The applicant makes the following submissions in its skeleton argument:

> *"40. It is accepted that the class 7 Goods are complementary to the class 35 services for which the 801 Mark is registered.*
> *41. It is accepted that the class 11 Goods are highly similar or identical to the class 11 goods for which the 606 Mark is registered.*
>
> *42. In respect of the G&S, it is accepted that the class 21 goods for which the 654 Mark is registered are lowly similar to the class 7 G&S, similar or identical to the class 8 G&S, lowly similar or dissimilar to the class 11 G&S, similar or identical to the class 21 G&S and complementary (and thus similar) to the subset of the class 35 G&S.*
>
> *43. The same applies to the class 21 goods for which the 733 Mark is registered, the class 8 goods for which the 306 Mark is registered, the class 11 goods for which the 606 Mark is registered (albeit these are similar to a higher degree to the class 7 and class 11 G&S and to a lower degree to the class 8 & class 21 G&S), and the class 35 services for which the class 801 Mark is registered (in each case in respect of the subset of the class 35 G&S identified in the relevant continuation sheet).*

44. In respect of the class 16 goods for which the 733 Mark is registered, it is admitted that there is identity with the subset of the class 16 G&S.

45. In respect of the class 41 services for which the 733 Mark is registered, it is admitted that there is identity with the subset of the class 41 G&S.

46. The same applies to the class 41 services for which the 306 Mark and the 787 Mark are registered.

47. In respect of the class 29 and 30 goods for which the 851 Mark is registered, it is accepted that there is similarity or identity with the class 30 G&S and low similarity with the class 31 G&S…."

138. The opponent's earlier mark 3596606 (the '606 mark) for MASTERCHEF is registered in class 11 and is not subject to proof of use requirements as it had not been registered for five years at the date the contested mark was filed, on 21 February 2023.

139. The applicant accepts that the class 11 goods in the application are highly similar or identical to the class 11 goods for which the '606 Mark is registered.[23]

140. I find they are identical because the applicant's goods in class 11 all fall within the broader terms 'apparatus and installations for cooking' and 'installations for refrigerating', which are the first two terms in the opponent's class 11 specification for the '606 mark.[24]

141. The opponent relies on three of its earlier MASTERCHEF marks in respect of class 41. The applicant accepts identity with the services relied on by the opponent and a subset of its services in this class. Trade mark 3703787, which is one of the marks relied on is not subject to proof of use. The contested specification in class 41 of the application includes 'entertainment'. The earlier mark includes 'entertainment services'. These are clearly identical services.

[23] See the applicant's skeleton argument at paragraph 41.
[24] See Meric

142. For reasons that will become clear, I will proceed on the basis of the identical goods in class 11 and the identical entertainment services in class 41. I will return to the remaining goods and services later.

The average consumer

143. The average consumer is deemed to be reasonably well informed and reasonably observant and circumspect. For the purposes of assessing the likelihood of confusion, it must be borne in mind that the average consumer's level of attention is likely to vary according to the category of goods or services in question: *Lloyd Schuhfabrik Meyer*, Case C-342/97.

144. I have outlined the relevant case law and tests to be applied at paragraphs 69-72 above. The opponent submits that the level of attention paid to the purchase of the parties' goods will be average. The applicant submits that for most of the goods the average consumer is a member of the general public paying a medium degree of attention but submits that for goods and services directed at chefs or restaurateurs, the cost is likely to be higher and thus the degree of attention higher.

145. With regard to goods in class 11, I refer to my findings above at x.

146. Entertainment services are likely to be bought by members of the general public and are likely to be fairly frequent purchases. The prices are likely to vary as consumers may consume entertainment as part of a package or as a one off payment for content. The purchase is likely to be primarily visual and will involve at least a medium degree of attention, as the consumer will need to ensure the content meets their requirements.

Comparison of the marks

147. The respective trade marks are shown below:

The opponent's mark:	The applicant's mark:
MASTERCHEF	MisterChef

148. The earlier mark is MASTERCHEF. It is presented in upper case with no additional stylisation. The overall impression rests in the whole mark.

149. The contested application is MisterChef. It is presented with a capital M at the beginning and a capital C as its seventh letter. Though I note, fair and notional use of a word trade mark means that it could also be used in, for example, upper or lower case. There is no additional stylisation. The overall impression rests in the whole mark.

Visual and aural comparison

150. The marks are visually and aurally highly similar, differing only in their second letter. Both will be divided into two elements, MASTER-CHEF and MISTER-CHEF. This is because they are each made up of two known words with which the average consumer will be familiar. The presence of two words is emphasised in the MisterChef mark by the capital letter at the start of the second word, CHEF.

Conceptual similarity

151. The parties' submissions are the same as they were in respect of the MisterChef and device mark that I have considered above. My findings are the same as they were above.

152. I find the parties' marks to be conceptually different.

Distinctive character of the earlier mark

153. My findings on inherent distinctive character are the same as above at paragraph 99.

154. In its skeleton argument the opponent claims that its earlier MASTERCHEF marks have an enhanced distinctive character so far as they concern “Merchandise of the kind described in [the opponent’s] evidence”. I have already explained why the opponent’s claim to enhanced distinctive character in relation to goods is unsuccessful.

155. With regard to entertainment services that include the MASTERCHEF television programme, the opponent clearly has enhanced the distinctive character of its marks through the use made of them, though given the low level of inherent distinctive character in MASTERCHEF the use has elevated the mark to that of a normal trade mark, a medium degree of distinctiveness.

Likelihood of confusion

156. In assessing the likelihood of confusion, I must adopt the global approach advocated by case law and take into account the fact that marks are rarely recalled perfectly, the consumer relying instead on the imperfect picture of them that they have kept in mind. I must also keep in mind the average consumer for the goods and services, the nature of the purchasing process and have regard to the interdependency principle i.e. a lesser degree of similarity between the respective trade marks may be offset by a greater degree of similarity between the respective goods and services and vice versa.

157. I have found the following:

- The goods are identical in class 11, entertainment services are identical in class 41
- the marks are visually and aurally highly similar
- the marks are conceptually different

- the average consumer is a member of the general public or a professional
- the purchase is primarily visual, though there may be a verbal element where advice is sought prior to purchase (in respect of the goods in class 11)
- The level of attention paid to the purchase will be at least medium
- the earlier mark has a very low degree of inherent distinctiveness
- the opponent has enhanced the distinctive character of its marks to medium in class 41 due to the use made of the MASTERCHEF marks for the MASTERCHEF television programme.

158. The marks are visually and aurally highly similar. Whilst these factors point towards a finding of confusion the marks are conceptually different and the visual difference is at the beginning of the marks, which, as a general rule, means that they are more likely to be noticed than differences that occur later in the competing marks.[25]

159. With regard to the different concepts, it is clear from case law that in some circumstances conceptual differences can counteract visual and aural similarities,[26] but that is not always the case.[27]

160. Having considered all of the relevant factors, the visual differences, small as they are, and the fact that both parties' marks have a below average degree of distinctiveness for cooking apparatus means that the differences are sufficient to avoid a likelihood of direct confusion for the goods in class 11. With regard to indirect confusion, I find that there is nothing about the marks that would lead the average consumer to conclude that the goods originated from the same or linked undertakings. Whilst I have found the purchase to be primarily visual, I do not rule out an aural element and have considered whether it would be a factor where the marks are misheard. The different meanings of the marks point away from that and the likelihood of them being imperfectly recollected.

161. With regard to the entertainment services in class 41, I bear in mind the use made of the MASTERCHEF marks for the television programme, which has led to the marks

[25] El Corte Inglés, SA v OHIM, the General Court, Cases T-183/02 and T184/02
[26] Picasso Estate v OHIM, CJEU, Case C-361/04 P at paragraph 20
[27] Nokia Oyj v OHIM, the General Court, Case T-460/07

enjoying an enhanced distinctive character. However, the word CHEF is inherently very weak for a television programme that is a cooking competition and when the MASTER element is added the combination indicates an expert chef, which is the purpose of the programme, to find and develop talented chefs. Accordingly, even in class 41, where the marks enjoy enhanced distinctive character, I find there would not be direct confusion between the marks as the conceptual differences provide too big a point of difference. Where words used in trade marks are lowly distinctive small differences will make a difference for the average consumer and the conceptual difference in this case is an obvious one. I also find that there is no indirect confusion as there is no obvious or likely way in which this would occur. MASTERCHEF's distinctiveness rests in the mark as a whole with neither of its elements providing significant distinctiveness individually. In these circumstances, it is not logical to alter either element. In addition, the opponent's own evidence indicates that when creating variations of the MASTERCHEF television programme, it always keeps the MASTERCHEF element intact. For example, MASTERCHEF the professionals and Celebrity MASTERCHEF. The average consumer has not been educated to expect a change in the construction of the MASTERCHEF marks, nor are such changes likely in a logical brand extension scenario.

The application in the remaining classes

162. I have considered identical goods for which the opponent does not have enhanced distinctiveness and have found there to be no likelihood of confusion. I have also considered identical services in class 41 for which the opponent has enhanced distinctive character and have found there to be no likelihood of confusion. I have considered whether it is necessary to make a finding based on other classes and I have decided it is not, because, none of these represent a better case for the opponent.

163. The opposition fails in full under section 5(2)(b) of the Act. I note that the omissions identified in paragraphs 46-48 have made no material difference to the outcome, as the opposition has failed.

The opposition under section 5(3)

164. I have outlined the relevant section of the Act above at paragraph 98 and have noted the relevant case law and the conditions required for section 5(3).

Reputation

165. In its skeleton argument the opponent submits:

> *"20. There can be no dispute that, by the dates of the opposed applications, the four earlier marks relied upon by Shine for this ground of opposition had the benefit of a massive reputation. This is not a case where the evidence of reputation just gets over the low bar for a section 5(3) objection."*

166. The opponent relies on services in class 41 for its earlier trade marks 906952733, 2563306 and 3703787. I accept on judicial notice that at the relevant date the opponent had a substantial reputation for "a television series in the reality genre in the field of cooking and food and presentation of competitions, games and studio entertainment," in class 41. The opponent also relies on class 9 of the '787 mark. To the extent that the goods in class 9 include downloadable versions of the MASTERCHEF television programme, I accept the opponent's reputation exists for those goods.

Link

167. The relevant case law can be found in the following judgments of the CJEU, reproduced at paragraph 106, above.

<u>The degree of similarity between the conflicting marks</u>

168. The similarity of signs under sections 5(2)(b) and 5(3) of the Act is assessed in the same way.[28]

[28] See the principles established in *Sabel BV v Puma AG*, Case C-251/95, *Canon Kabushiki Kaisha v Metro-Goldwyn-Mayer Inc*, Case C-39/97, *Lloyd Schuhfabrik Meyer & Co GmbH v Klijsen Handel B.V.* Case C-342/97, *Marca Mode CV v Adidas AG & Adidas Benelux BV*, Case C-425/98, *Matratzen Concord GmbH v*

169. I have found the competing marks to be highly similar visually and aurally, but conceptually dissimilar.

The nature of the goods or services for which the conflicting marks were registered, or proposed to be registered, including the degree of closeness or dissimilarity between those goods or services, and the relevant section of the public

170. The goods in the specification of the contested application are dissimilar to the entertainment services for which the opponent has a reputation, though to the extent that the goods are connected to cooking, being ingredients, cooking apparatus and so on, then the users of the goods, with an interest in cooking are likely to be aware of the entertainment services.

The strength of the earlier mark's reputation

171. The earlier MASTERCHEF mark has a substantial reputation for the entertainment services and related goods I have identified earlier.

The degree of the earlier mark's distinctive character, whether inherent or acquired through use

172. The inherent distinctive character of the earlier mark MASTERCHEF is very low for entertainment services that take the form of a TV show that identifies and develops talented chefs. In that context it is highly allusive if not descriptive. However, extensive use of the mark for entertainment services in the form of a TV show has elevated it to a medium degree of distinctiveness.

Whether there is a likelihood of confusion

OHIM, Case C-3/03, *Medion AG v. Thomson Multimedia Sales Germany & Austria GmbH,* Case C-120/04, *Shaker di L. Laudato & C. Sas v OHIM*, Case C-334/05P and *Bimbo SA v OHIM*, Case C-591/12P.

173. Whether or not there is a likelihood of confusion is one factor in the assessment and is not necessarily decisive, though if there is a likelihood of confusion there is bound to be a link made in the mind of the relevant public. In this case, the differences between the marks and the competing goods and services are sufficient to avoid a likelihood of confusion.

174. I have found there not to be a likelihood of confusion for both goods and entertainment services. I have also explained why I do not accept the opponent's claim that its merchandising under the MASTERCHEF marks would increase the likelihood of the public expecting MisterChef goods to be connected to the MASTERCHEF programme. This is because the opponent has not sought to rely on any goods registered under its earlier trade marks under this ground and, the opponent's evidence falls a long way short of establishing that at the relevant date the UK public would have been sufficiently aware of the merchandising of MASTERCHEF goods.

175. I have considered, at length, whether or not a link would arise in this case. In respect of the goods classes in the application I find there would not be, for all of the reasons already given and in particular, the conceptual differences, which are too great.

176. With regard to the entertainment services, I bear in mind that these could be identical services in the field of television and could relate to cooking and cooking TV shows. The shared CHEF element in the competing marks is descriptive for any such services and it is in combination with MASTER that the MASTERCHEF marks have achieved a reputation. The opponent's own evidence of reputation clearly shows that the MASTERCHEF element is never divided or altered in any of the programmes that have enabled it to achieve its reputation. The relevant public have been educated over the years of MASTERCHEF programming to expect the TV show to be provided under the MASTERCHEF title with other elements added to indicate the various versions of the programme, for example, Celebrity MASTERCHEF and MASTERCHEF The Professionals. Consequently, when the relevant public encounters the MisterChef mark, even for identical services, the coincidence of the descriptive CHEF element will not be surprising, given the subject matter. When parties use very lowly distinctive elements for trade marks, small differences can be enough to separate them and that

is the case here, particularly as here, the concepts of the two marks are different and use of the MASTERCHEF marks has never been in a form where MASTER has been separated or substituted with any other words. The additional element ‘Mister’ added to ‘Chef ‘creates such a clearly different concept that prevents a link from being made.

177. Unless there is a link made between the marks, there can be no unfair advantage taken of the earlier mark’s reputation and so, the opposition under section 5(3) fails.

The 5(4)(a) ground

178. Relevant parts of the Act and caselaw have already been outlined earlier in this decision at paragraphs 113 and 114.

179. The opponent relies on its claimed goodwill for:

- Entertainment services, namely, a television series in the reality genre in the field of cooking and food;
- production, presentation and distribution of television programs;
- audio-visual recordings and downloadable television shows;
- associated merchandise, including cookware, kitchen appliances, kitchen utensils and apparatus, knives, chopping boards, aprons, and oven mitts, and cook books;
- the licensing of IP rights for merchandise products.

180. Clearly, the opponent has substantial goodwill in the MASTERCHEF sign for the first of these. As I found above, the opponent’s goodwill also extends to downloadable episodes of the television programme. There is insufficiently solid evidence for me to conclude that the opponent had the necessary goodwill for the remaining categories claimed.

181. With regard to the licensing of IP rights, the opponent has provided evidence of licence partners that it has had agreements with. This is not evidence that the opponent has provided an IP licensing service under the MasterChef sign.

182. In *Marks and Spencer PLC v Interflora*, [2012] EWCA (Civ) 1501, Lewison L.J. had previously cast doubt on whether the test for misrepresentation for passing off purposes came to the same thing as the test for a likelihood of confusion under trade mark law. He pointed out that it is sufficient for passing off purposes that "a substantial number" of the relevant public are deceived, which might not mean that the average consumer is confused. However, in the light of the Court of Appeal's later judgment in *Comic Enterprises*, it seems doubtful whether the difference between the legal tests will (all other factors being equal) produce different outcomes. This is because they are both normative tests intended to exclude the particularly careless or careful, rather than quantitative assessments.

183. I have found that, at the relevant date, the opponent had a substantial reputation in the UK in relation to a television series in the form of a cooking competition. I am satisfied that the opponent also had sufficient goodwill in the sign 'MASTERCHEF' to bring an action for passing off. However, due to the clear conceptual differences between the marks I find that use of the applied-for mark would not have resulted in the necessary misrepresentation. This is the case for all of the goods and services in the application, including the entertainment services in class 41.

184. Where there is no misrepresentation there can be no damage. The opposition under section 5(4)(a) fails.

COSTS

185. The applicant has been successful and is entitled to a contribution towards its costs. The oppositions were filed on 13 April 2023 and 17 July 2023. Tribunal practice notice 1/2023 provides the applicable scale for tribunal cases launched after 1 February 2023 and is relevant here, though I bear in mind that the applicant was not professionally represented in the five months from 21 September 2024 until 24 February 2025. I award costs on the following basis, bearing in mind there are two oppositions, the applicant did not file evidence and there is some degree of duplication in the material filed:

Preparing a statement and considering the other side's statement x 2 -	£450
Commenting on the other side's evidence (for two oppositions) -	£500
Preparing for and attending a hearing -	£800
Total	**£1750**

186. I order Shine TV Limited to pay SDA Group Ltd the sum of £1750. This sum is to be paid within 21 days of the expiry of the appeal period or within 21 days of the final determination of this case if any appeal against this decision is unsuccessful.

Dated this 22nd day of October 2026
